Dear NOAA,

I believe the United States needs to honor their commitments. Native peoples have long been the butt of too many jokes played on them by capitalists.

The treaty of 1855 should be upheld in much the way our Supreme Court chooses to interpret our Constitution. To the letter - strictly 19th century:

No motor launches.
No exploding harpoons.
No rifles.
No chainsaws.

You want to feel like a Buck - you pay the dues!
