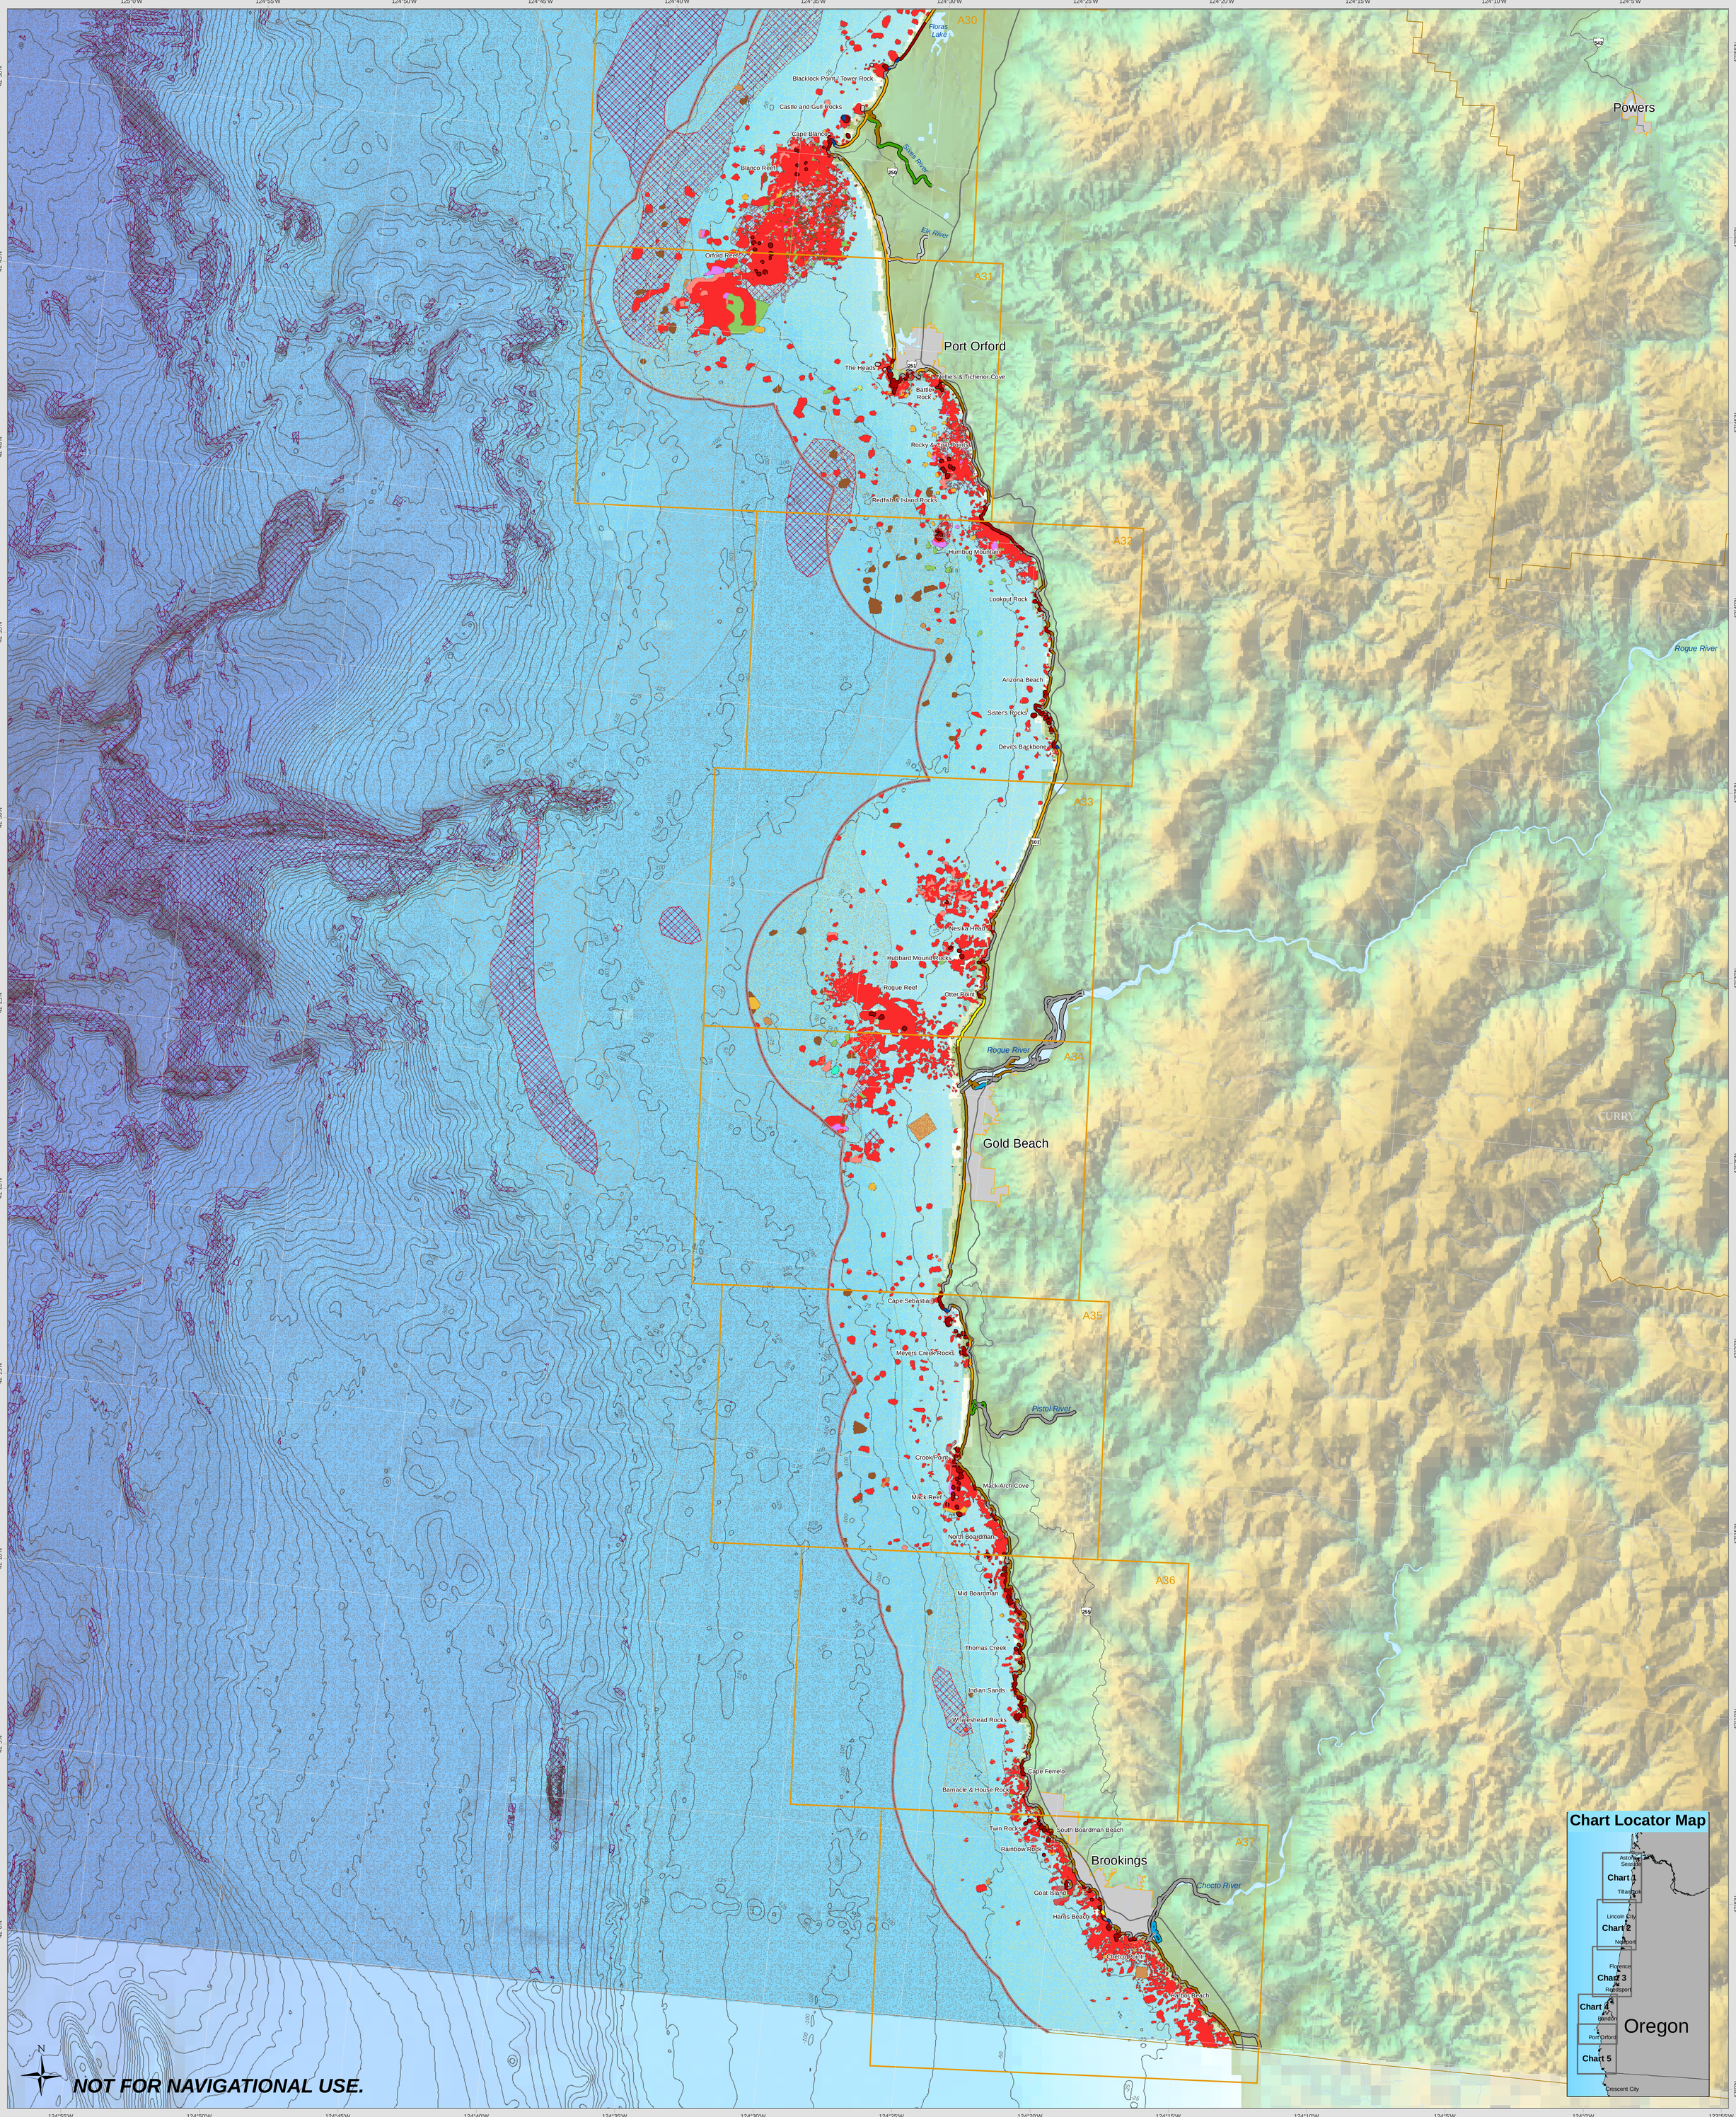
# Seafloor and Shoreline Reference Chart Series — Southernmost Coast Section of Oregon — Chart 5



Shoreline Geomorphology and Exposure (NOAA ESI)

- Undefined
- Marshes
- Exposed Rocky Shores and vertical seawalls
- Wave-cut platforms and exposed pier structures
- Fine-grained sand beaches
- Medium-to coarse-grained sand beaches
- Mixed sand and gravel beaches
- Gravel beaches and exposed riprap
- Sheltered rocky shores and coastal structures
- Sheltered tidal flats

Oregon Seafloor Sediment (OSU, 2004)
Sediment Type (Dominant/Subdominant)

- ROCK
- BOULDER
- COBBLE
- GRAVEL
- MIX SAND/GRAVEL
- SAND
- SAND/MUD
- MUD

Territorial Sea Sediment Map (OSU, 2008)
Sediment Type

- Rock
- Rock/Shell
- Rock/Sand
- Boulder
- Cobble
- Gravel
- Shell/Gravel
- Shell
- Sand/Gravel
- Sand/Shell
- Sand
- Mud/Sand
- Mud

- Oregon Territorial Sea 3 nm
- Evaluation Proposal Map Index
- Rocky Reef, Groundfish Essential Fish Habitat
- Depth Contours, 25m (OSU, 2008)

Note: The white pixels to west of the shoreline represent areas where no elevation data exist.

The spatial information shown in this map was obtained from a variety of sources. Care was taken in the presentation of these data, and they are provided "as is". The cartographers accept no responsibility for errors, omission, or positional accuracy in the underlying digital data. There are no warranties, expressed or implied accompanying these maps. Notification of any errors would be appreciated.

The data layers presented in these maps are a compilation of various data collection efforts and may represent multiple surveys over time. For detailed information about any one layer, please see the associated documentation.

For the seafloor information represented in these charts, the underlying data were acquired at various spatial scales and resolutions with inconsistent spatial coverage. For areas where fine scale data exists the interpretation of habitat is much more detailed.

Cartography by Andy Lanier and Barb Seekins
