Across

4. Born in fresh water, goes out to sea to forage and grow, but comes back to freshwater to spawn
6. Silver salmon
8. A larger juvenile salmon, also called a fingerling. These fish often have camouflage of the stream often seen as long oval shaped bars along their sides or back.
9. Humpy, Humpback salmon
10. Adult fresh water phase, where the fish display a variety of colors between the males and females.
11. Reproducing or breeding only once in a lifetime
12. King, Black mouth, Tyee Salmon
14. Sea-run rainbow trout, or a rainbow trout that goes out to sea and back to fresh water to spawn
15. Newly hatched fish with the egg sac still attached to the belly of the fish. This life stage is not feeding, they are absorbing the nutrients from the egg sack still.
18. Live their whole life in freshwater, often a few miles from their natal stream
19. Multiple reproductive cycles over the course of its lifetime

Down

1. Also known as coastal cutthroat, this trout like salmon goes out to the ocean and back to spawn.
2. A juvenile salmonid that is preparing to go out to sea; its internal organs are adjusting to the salinity changes and the overall color changes to silver
3. Ocean phase of salmonids, often bright silver in color
5. Red salmon, Blue backs
7. Lives whole life in freshwater, often a healthy pink stripe on side and rosey gill plates
13. A sockeye salmon that does not migrate to the ocean and lives entire life in freshwater.
16. Dog salmon, Keta, or calico
17. A juvenile salmonid that has absorbed its egg sac and is rearing in the stream
