### PACIFIC COAST GROUND FISH FISHERY Changes to commercial fishery management measures

The National Marine Fisheries Service (NMFS) announces changes to commercial fishery management measures for the Pacific Coast groundfish fishery off Washington, Oregon, and California, **effective May 1, 2012.**

The Pacific Fishery Management Council (Council) recommended changes to management measures at their April 1-6, 2012 meeting in Seattle, WA. Changes to management measures are being implemented in a *Federal Register* notice that will become effective on May 1, 2012. These changes are described in this public notice.

#### Commercial Fishery

##### *Limited Entry Fixed Gear and Open Access Sablefish Daily Trip Limit (DTL) Fisheries*

For complete regulations governing the limited entry fixed gear groundfish fishery, please see Title 50 CFR Part 660, subpart E. Current trip limit tables, Tables 1-3 (North and South), are included at the end of this public notice.

The Council considered the most recently available 2011-2012 fishery data in order to develop and monitor appropriate stable trip limits for each of these fisheries for 2012 such that catch of sablefish does not exceed the 2012 harvest specifications.

##### Limited Entry Fixed Gear Sablefish DTL Fishery North of 36° N. Lat.

Therefore, the Council recommended and NMFS is implementing the following reduced trip limits for 2012, beginning May 1, which are anticipated to

achieve, but not exceed the fishery's northern ACL for sablefish in 2012:

- **Limited Entry Fixed Gear, North of 36° N. lat., from "1,300 lb (590 kg) per week, not to exceed 5,000 lb (2,268) per 2 months" to "1,000 lb (454 kg) per week, not to exceed 4,000 lb (1,814 kg) per 2 months"** beginning in period 3, May 1, 2012 through the end of the year.

See Table 2 (North) and Table 2 (South) to Subpart E, attached, for this change to sablefish trip limits.

Visit the NMFS Northwest Region website for current groundfish management regulations, VMS information, and RCA boundary coordinates.

#### *Incidental Halibut Retention*

The catch sharing plan for Pacific halibut fisheries in Area 2A (waters off the U.S. West coast) allows for an incidental total catch limit for halibut during the limited entry fixed gear sablefish primary season (i.e. tier limit fishery). For 2012, this incidental catch limit is allowed **only North of Pt. Chehalis, WA (46°53.30' N. lat.)** due to a higher total allowable catch for Pacific halibut in Area 2A.

In order to allow incidental halibut catch in this fishery, NMFS has implemented the following Pacific Council recommendations for changes to the incidental halibut retention regulations at 50 CFR 660.231 (b)(3)(iv) applying to sablefish tier limit fishery participants using longline gear north of Point Chehalis, WA (46°53.30' N. lat.):

- 50 lb (23 kg) dressed weight of halibut (head on) for every 1,000 pounds (454 kg) dressed weight of sablefish landed and up to 2 additional halibut in excess of the 50-pound-per-1,000-pound ratio per landing.

**Trip limit tables, effective May 1, 2012  
are included at the end of this public notice.**

1/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours, and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to the RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

2/ The "modified" fathom lines are modified to exclude certain petrale sole areas from the RCA.

3/ "Other fish" are defined at § 660.11 and include sharks (except spiny dogfish), skates (except longnose skate), ratfish, morids, grenadiers, and kelp greenling.

26	<b>SALMON TROLL</b> (subject to RCAs when retaining all species of groundfish except for yellowtail rockfish and lingcod, as described below)							<b>TABLE 3 (North) con't</b>
27	North	Salmon trollers may retain and land up to 1 lb of yellowtail rockfish for every 2 lbs of salmon landed, with a cumulative limit of 200 lb/month, both within and outside of the RCA. This limit is within the 200 lb per month combined limit for minor shelf rockfish, widow rockfish and yellowtail rockfish, and not in addition to that limit. Salmon trollers may retain and land up to 1 lingcod per 15 Chinook per trip, plus 1 lingcod per trip, up to a trip limit of 10 lingcod, on a trip where any fishing occurs within the RCA. This limit only applies during times when lingcod retention is allowed, and is not "CLOSED." This limit is within the per month limit for lingcod described in the table above, and not in addition to that limit. All groundfish species are subject to the open access limits, seasons, size limits and RCA restrictions listed in the table above, unless otherwise stated here.						
28	<b>PINK SHRIMP NON-GROUNDFISH TRAWL</b> (not subject to RCAs)							
29	North	<b>Effective April 1 - October 31:</b> Groundfish: 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.						

- 1/ Bocaccio, chilipepper and cowcod rockfishes are included in the trip limits for minor shelf rockfish. Splitnose rockfish is included in the trip limits for minor slope rockfish.
- 2/ "Other flatfish" are defined at § 660.11 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.
- 3/ For black rockfish north of Cape Alava (48°09.50' N. lat.), and between Destruction Is. (47°40' N. lat.) and Leadbetter Pnt. (46°38.17' N. lat.), there is an additional limit of 100 lbs or 30 percent by weight of all fish on board, whichever is greater, per vessel, per fishing trip.
- 4/ The minimum size limit for lingcod is 22 inches (56 cm) total length North of 42° N. lat. and 24 inches (61 cm) total length South of 42° N. lat.
- 4/ "Other fish" are defined at § 660.11 and include sharks (except spiny dogfish), skates (except longnose skates), rattfish, morids, grenadiers, and kelp greenling. Cabezon and longnose skate are included in the trip limits for "other fish."
- 6/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57.50' N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 31).
